NOTIFICATION OF PROPOSED RESEARCH CRUISE

PART B: DETAIL

1. NAME OF RESEARCH SHIP: "Johan Hjort" CRUISE NO. 2012207
2. DATES OF CRUISE From 3 May 2012 To 2 June 2012

3. a) PURPOSE OF RESEARCH

The main purpose of the cruise is the assessment of the herring and blue whiting, i.e. stock size and distribution using acoustic methods combined with sampling with pelagic trawls. The cruise is part of an international coordinated survey with vessels from the Faroes, Iceland, EU (Denmark), Norway, and Russia participating. Information on other species such as argentinies, mackerel and red fish is collected upon encounter. The survey is coordinated by ICES Working Group on Northeast Atlantic Pelagic Ecosystem Surveys. The overarching plan of the survey is available in the web (<http://www.ices.dk/reports/SSGESST/2011/WGNAPES11.pdf>).
Hydrographic investigations by use of CTD sonde, and plankton investigations using plankton nets.

b) GENERAL OPERATIONAL METHODS (including full description of any fish gear, trawl type, mesh size, etc.)

Echo sounding and pelagic trawling, CTD and plankton nets.

4. ATTACH CHART showing (on an appropriate scale) the geographical area of intended work, positions of intended stations, tracks of survey lines, positions of moored/seabed equipment, areas to be fished

5. a) TYPES OF SAMPLES REQUIRED (e.g., geological/water/plankton/fish/radionuclide).

Fish, plankton and water.

b) METHODS OF OBTAINING SAMPLES (e.g., dredging/coring/drilling/fishing, etc. When using fishing gear, indicate fish stocks being worked, quantity of each species required, and quantity of fish to be retained on board

Fishing with pelagic trawl on acoustic registrations, of which approx. 100 individuals/haul of the target species are required. Plankton and hydrographic samples on pre-defined stations.

6. DETAILS OF MOORED EQUIPMENT

7. ANY HAZARDOUS MATERIALS (chemicals/explosives/gases/radioactives, etc. (Use separate sheet if necessary)

	None
a) <u>Type and trade name</u>	NIL
b) <u>Chemical content</u> (and formula)	NIL
c) <u>IMO IMDG code</u> (reference and UN no.)	NIL
d) <u>Quantity and method of storage on board</u>	NIL

8. DETAIL AND REFERENCE OF

a) Any relevant previous/future cruises

Conducted since 2000 and a similar cruise for spring 2013 is planned.

b) Any previously published research data relating to the proposed cruise

9. NAMES AND ADDRESSES OF SCIENTISTS OF THE COASTAL STATE(S) IN WHOSE WATERS THE PROPOSED CRUISE TAKES PLACE WITH WHOM PREVIOUS CONTACT HAS BEEN MADE

(See add. sheet)

10. STATE

a) Whether visits to the ship in port by scientists of the coastal state concerned will be acceptable
(Yes/No)

Yes

b) Participation of an observer from the coastal state for any part of the cruise together with the dates and the ports for embarkation and disembarkation

Acceptable. Dates and ports to be closer settled if wanted by the coastal states.

c) When research data from the intended cruise is likely to be made available to the coastal state and by what means

26-29 June 2012, as cruise report (one report for the international survey). The results will be summarized in a post cruise meeting in Reykjavik, Iceland and reported to the ICES Working Group for International Pelagic surveys.
