Periphery for a sustainable  
and prosperous future

## Pre-Announcement Fifth Call for Applications

The Fifth Call will officially be announced on 3<sup>rd</sup> of February 2010, when the application and final agreement has been made by the Programme Monitoring Committee on the exact nature of the call. This pre-announcement is an indication of what the call will cover and the focus areas and details to keep in mind when developing proposals.

The Fifth Call for Applications will run from the **3<sup>rd</sup> of February** to the **24<sup>th</sup> of March 2010**. The call is open to applicants from across the programme area and to projects addressing both priorities:

- 1. Promoting innovation and competitiveness in remote and peripheral areas**
- 2. Sustainable development of natural and community resources**

### Themes

At its last meeting, the Programme Monitoring Committee (PMC) made an analysis of the themes addressed by the 27 approved main projects so far. In addition it took into consideration the results on the 1<sup>st</sup> ongoing evaluation exercise that has been carried out in autumn 2009. **The Fifth call will be a focused call** where projects should demonstrate their potential to fight the severest impacts of the economic crisis, creatively seek to the creation of jobs and businesses that prevent unemployment and develop innovative solutions for finding new ways out of the economic crisis. Projects should seek to turn the economic crisis into opportunities by combining technological sectors with non-technological sectors, even taking risks to be different and collaborate where traditional and creative industries can meet.

The economic crisis and its current impacts indicate that applications to the Fifth call should focus on **Priority 1**, in the Objective 1.

However, **the PMC has identified the following programme gaps that need to be addressed:**

1. exchange of best practise and establishment of cooperation networks between R&D institution and SMEs to increase the capacity for innovation, facilitate the design of innovation systems and strengthen competitiveness
2. urban-rural partnerships for new service solutions

**Northern  
Periphery  
Programme**

2007–2013

Innovatively investing  
in Europe's Northern  
Periphery for a sustainable  
and prosperous future

**In addition, the PMC specially welcomes proposals to the following six themes that could be more strongly addressed:**

1. cooperation and exchange of best practice between SMEs on how to address and reach markets with existing and new products
2. increased use of ICT to overcome distance
3. developing innovative product and service solutions for developing and maintaining transport infrastructure with regard to roads, railways, airports and ports under harsh climatic conditions
4. development of transport schemes that benefit rural communities, such as new maritime routes
5. private, public and voluntary sectors cooperation and networks to develop new and innovative service solutions for remote and peripheral regions
6. promotion of natural and cultural heritage that supports the development of sustainable industries

The PMC also welcomes applications in all other programme objectives and themes. However, it views **priority 2**, the theme “**Developing new approaches to efficient and sustainable management and utilisation of resources**” as already covered. Applicants submitting a project proposal under this objective and theme need to strongly justify the need of the project and demonstrate concrete tangible added value in products and services to be developed.

The NPP regions have been quite badly affected by the economic crisis, some countries in particular. Partnerships should try to cover interest in the West-Atlantic area, the North-Atlantic area and the Nordic countries and to encourage participation from all these different areas. Projects having pre-dominantly a cross-border character are discouraged. In addition, projects should demonstrate SME involvement or at least associate with SME partners.

Projects should realise industrial development based on collaboration between traditional and creative sectors to produce products and services, thereby, reducing the innovation and creativity gap within the Northern Periphery Area to become more competitive than other economic trading blocks.

# Northern Periphery Programme

Innovatively investing  
in Europe's Northern  
Periphery for a sustainable  
and prosperous future

## Available Funding

No specific budget allocation has been set for this Fifth Call. Between 2007 and 2013 the Programme will commit around €45 million to projects that address the priorities for transnational cooperation: €35.115 million of European funds (ERDF) will be available to partners in Member States and €10.155 million for partners in the Non member States. 60% of the funds is available for projects applying under Priority 1 and 40% for projects under Priority 2. After the first four calls, in which 27 projects were approved, 64% of the programme funds for projects has been allocated.

The recommended minimum size for a main project's total budget is €250 000 and the recommended maximum size is €1.5 million. In general, a 60% grant rate is applied for partners in Member States and 50% for Non Member States. For Norwegian partners, a grant rate of 50% applies. For Greenlandic partners a grant rate of 60% applies. Note that 10 % funding source and 20 % funding source have a grant rate of 50 %.

For the Fifth call it should be underlined that partnership could consider to balance the grant rate between different member state partners in a project partnership to ensure a broad participation from all regions, especially to ensure inclusion of regions strongly affected by the economic crisis (e.g. 65% Grant rate for partners from Northern Ireland and Ireland and a lower intervention rate for other Member State partners in the same partnership) However the overall Grant rate for member state partners in one project would stay at 60%).

## Application Pack

The Application Pack for the Fifth Call is available on the NPP website from 3<sup>rd</sup> of February 2009.

The pack will consist of 3 main documents, all of which should be downloaded and read carefully:

- Application Form: Parts 1-2 in Word format and Part 3 in Excel format
- Application Instructions
- Programme Manual: Part 1 How to Apply and Part 4 Common Eligibility Rules

## Decisions

Decisions on all main project applications submitted to the Fifth Call for Applications will be made at the Programme Monitoring Committee meeting in June 2009.

## How to Apply Seminar

The Programme Secretariat is organising two seminars on How to Apply for the Fifth Application Call, to be held on **23<sup>rd</sup> of February 2010** in Copenhagen, Denmark. The purpose of the events is to assist applicants in the development of a good quality application. For more information, please keep an eye on the programme website and/or contact the Programme Secretariat.

## Sixth Call

Please note that the Sixth Call for Applications will be launched **3<sup>rd</sup> of September 2010**. **The PMC views the Sixth Call as potentially a focused call with few and potentially more elaborated themes including a strong focus to generate strategic projects**. More information about the exact nature of the Sixth Call will be published in July 2010 to inform applicants in good time about what will be expected from them.

Please contact the Regional Contact Points or Northern Periphery Programme Secretariat for further guidance on the programme. Contact details are available on the NPP 2007-2013 website: [www.northernperiphery.eu](http://www.northernperiphery.eu).

## Important Dates

**Call Opens: 3<sup>rd</sup> of February 2010**  
**Call Closes: 24<sup>th</sup> of March 2010**
